I don't have any estimate or information about finishing the investigation which requires comparing the existing lighting to the new lighting but Danny said today he will have lighting fixture types and quantities when the construction estimates come in. We will have to finish this SOW to include the final analysis showing energy reduction so that we have a document to support reduction in

annual operating costs.

The lease required the lessor to provide expense receipts during the exercising of the 10 year option.

FERC hasn't received any energy consumption data from the Lessor since 2014.
